Subject Raw Data Archive

AQS Users,

The AQS database was planned to maintain the most current 10 years of raw data in the production database and all other years in an archive database. The raw data archiving has not been performed to keep this planned design.

The current AQSPROD database contains 1993 to 2006. Next month, we plan to archive 1993, 1994, and 1995 raw data so that the database will again contain the last 10 years plus the current year.

This is to notify you that these years of raw data (1993 to 1996) are still available for updating. I will be out of the office from June 19 to 23. If you want to update any of these years while I am out of the office, please contact Jonathan Miller to assist you.

Thanks,

Jake Summers
